WELCOME MESSAGE

Like never before in remembered history we all are struggling through a phenomenon that has universally adversely impacted health in all its dimensions. We all have been struggling with this crisis of the pandemic created by the unseen and unknown enemy.

On the backdrop of this colossal challenge to our very existence, the fundamental meaning of life and also of death, are out in the open for questioning and investigating. Medics and colleagues are closest witnesses to this catastrophe by virtue of their education training duties and also, expectations from society. All of us are learning painfully and helplessly, how much still there is to learn in order even to survive.

Bidirectional mind- body interactions are not new to the medical field. Any stress will affect mind and body alike, though individual response and resultant morbidity will differ from person to person. Long standing medical illnesses and psychosomatic illnesses need integrated approach for management. Insights from our age old techniques of Yoga and meditation to modern ways of handling stress will be discussed in the conference. Some common but difficult situations like handling death and bereavement will also be discussed.

We have invited faculties, researchers in their respective fields, and professionals who have passionately devoted their lives for their work. Many of them have been recognized nationally and internationally for their work. We hope they would kindle awareness amongst us enabling us to manage ourselves and others around us in this crisis. We firmly believe there is no single field of human enquiry which will give us comprehensive solutions. That's why we chose to have the theme ' Mind, body, medicine and beyond...'

We cordially invite you to join this opportunity for participating in a creative and even out of the box endeavor to help and care for those in need....we are sure you will equally be delighted at this opportunity , even in the somber times...

We look forward to meet you soon at our teleconference on the **6th and 7th August 2021.**

Kind regards and best wishes for health and safety during these difficult times...

Yours sincerely
Research society conference team of SKNMC!
